

Compliance Statement for Export to the USA

TSCA (Toxic Substances Control Act):

Arvid Nilsson confirms that all metal products exported to the USA and all future exports comply with the requirements of the Toxic Substances Control Act (TSCA).

We have verified that all metals and alloying elements are listed as active in the TSCA Chemical Substance Inventory and that there are no regulatory flags attached to them. This means that the products are not subject to any special requirements under the regulations.

CA Prop-65 (California Act Proposition 65):

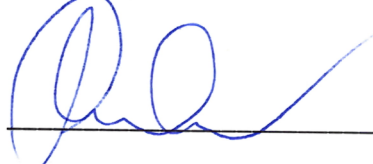

Arvid Nilsson assures that all metal products do not contain any substances on the California Proposition 65 List except nickel found in stainless steel and nickel-plated products.

The reason for including metallic nickel is that inhaling dust can increase the risk of cancer in the nasal cavity, sinuses and lungs. The metal products that Arvid Nilsson supplies are in solid form and the risk therefore only exists if the products are processed mechanically.

Arvid Nilsson remains committed to ensuring full compliance and monitors requirements and regulations for both TSCA and CA Prop-65 and assesses whether changes affect our products.

For further information or specific questions, please contact our manager for environment and sustainability.
